Install nVidia drivers only because who needs the GeForce Experience at work.

Total Time: Minutes**Estimated Cost:** 0**Tools:** 7Zip

3 Steps total

Step 1: Download the nVidia drivers

From here: <https://www.nvidia.co.uk/Download/index.aspx>

Step 2: Unpack the drivers

I used 7Zip for this: <https://www.7-zip.org>

Step 3: The command line

```
.\setup.exe Display.Driver HDAudio.Driver -clean -s
```

Deploy with whichever deployment method works for you.
